

Laboratory services

In order to ensure your required product specifications, numerous test procedures are at your disposal.

- Coating layer thickness measurement - X-ray measurements (non-destructive)
- Corrosion test according to DIN - SS, ESS, CASS, SO2
- Manual welding test according to BAM or customer specifications
- Laboratory electroplating for bath testing or for trial coatings
- Metallography and tempering
- Adhesion test

Development and construction

Profit from our extensive know how already in the development phase.

- Construction of components / sub-assemblies in 3D Autodesk CAD software inventory
- Process development
- Development of coating system attuned to the respective product

**Do you need special analyses in your production processes?
Which quality assurance measures can we help you with?
Or do you need support in the development and construction?
Call us - we're there for you.**
